

BHUPENDRA SHARMA

Consultant – Cloud & IT Ops

+91-9871144731

bhupen77@yahoo.com
bhupen77@gmail.com

JOB OBJECTIVE

Aspire to excel in the information technology domain, emphasizing cloud infrastructure and IT operations, while utilizing extensive expertise to drive innovative solutions and enhance operational efficiency.

EDUCATION

Bachelor of Arts, Delhi University, 2002

CORE COMPETENCIES

IT Infrastructure Management

Cloud and On-prem Migration Strategies

Service Level Agreement Compliance

Incident and Problem Management

Risk Assessment and Mitigation

Vendor Management and Coordination

Change Management Processes

Technical Documentation and Reporting

Team Leadership and Development

Client Relationship Management

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure, Google Cloud Platform (GCP)

Azure Services: Azure Virtual Machines, Azure Virtual Desktop (AVD), Virtual Machine Scale Sets (VMSS), App Services, Azure SQL (PaaS), Azure Entra ID, Azure Active Directory, Azure Automation, Azure Monitor, Azure Advisor

Networking & Security (Azure): Virtual Network (VNET), Network Security Groups (NSG), ExpressRoute (ER), Site-to-Site VPN (S2S), Point-to-Site VPN (P2S), Load Balancer, Application Gateway (WAF), Azure Front Door

Scripting & Automation: PowerShell, Azure CLI, Cloud Shell

Server & OS Administration: Windows Server 2019, 2022, 2025

Virtualization: VMware, Hyper-V, Nutanix

Identity & Access Management: Active Directory, Azure Entra ID, MFA, RBAC, IAM, Conditional Policies

Monitoring & ITSM Tools: Azure Monitor, third-party monitoring tools, ITSM tools (aligned with ITIL processes)

Database Management: Azure SQL PaaS (provisioning, backup, restore, optimization)

Disaster Recovery & Business

Continuity: BCP/DR Design & Execution, Azure-based DR solutions

Project & Service Management: ITIL v3 processes (Incident, Problem, Change, Capacity, Event Management), CAB, WSR, MSR

PROFILE SUMMARY

- Possess a wealth of experience 19 years in managing IT infrastructure, with a strong emphasis on cloud technologies and achieving operational excellence across various sectors.
- Function as a Consultant in Cloud & IT Operations at COFORGE LTD, where the management of essential IT operations is prioritized to guarantee uninterrupted service delivery for numerous clients utilizing a shared services framework.
- Working as Cloud & Infrastructure Lead in Shared Services (Managed Services) model, managing 25+ engineers across Azure, Wintel, Virtualization and Backup domains
- Realized substantial enhancements in operational efficiency and service quality within the current position, which directly contributed to increased customer satisfaction and improved retention metrics.
- Exhibit exceptional leadership skills by cultivating a cooperative team atmosphere that promotes high performance & accountability, ensuring alignment with organizational objectives.
- Showcase proficiency in establishing robust security measures and compliance protocols, which safeguard the integrity and accessibility of client infrastructure and applications.
- Initiated and led a strategic cost optimization project that achieved decrease in operational expenses for major clients, reflecting a dedication to providing value-oriented solutions.
- Possess extensive knowledge of hybrid cloud architecture, effectively integrating on-premises systems with cloud solutions to improve operational flexibility and scalability.
- Progressed through various roles, starting as a Desktop Engineer and evolving into a leadership position, acquiring a wealth of knowledge in cloud migration, infrastructure management, and team leadership along the way.

WORK EXPERIENCE

COFORGE LTD (Feb'2007 to Present)

Current Designation: **Senior Consultant – IT Ops Services**

Current Role: **Cloud & Infrastructure Operations Lead**

Key Responsibilities:

- Architected and implemented tailored cloud and hybrid infrastructure solutions on Microsoft Azure and on-prem environments, ensuring client-specific needs are met.
- Led 24x7 global IT operations, focusing on high availability, SLA adherence, and proactive incident prevention through continuous monitoring.
- Directed seamless migration of legacy infrastructure & applications to Azure with minimal downtime.
- Governed Azure networking components (VNET, NSG, VPN, ExpressRoute, Application Gateway, Load Balancer) to ensure secure and resilient connectivity.
- Managed Azure resources (VMs, AVD, VMSS, App Services, MSSQL databases) with emphasis on provisioning, backup/restore, and performance tuning.
- Implemented ITIL-aligned service management practices to enhance operational reliability across Incident, Change, Problem, and Capacity Management.
- Led RCA for P1/P2 incidents, ensuring permanent resolutions and process improvements.
- Conducted Weekly and Monthly Service Reviews, presenting IT health reports, risk assessments, and improvement plans to clients.
- Designed and executed BCP/DR strategies, conducting drills to validate compliance with client RTO/RPO requirements.
- Oversaw security implementations using IAM, Azure Entra ID, MFA, and other controls, while optimizing costs through Azure Cost Management tools.

Achievements:

- Played a pivotal role in the organization's first Azure Cloud project starting in 2018, setting up shared services operations from scratch.
- Led cost optimization initiatives across multiple accounts resulting in significant recurring savings (Cost saving of US\$ 117651.56 in FY 2023-24 by Analyzing Customer's Cloud Environment and Identifying the resources to be decommissioned/deleted and by changing Service tier/plan and by reserving instances (RI)).
- Many other appreciation awards (Customer choice, PAT on the back and Star performer) in periodic Town Hall sessions hosted by senior leadership at vertical level.
- Received the "Annual Excellence Award" in 2009 and 2019 at COFORGE LTD for exemplary service delivery and innovation in cloud operations.
- Introduced automation scripts (PowerShell, Azure CLI) for routine infra tasks, resulting in a 20–30% reduction in manual operational effort.
- Consistently ensured SLA adherence with 99.9% uptime across managed customer infrastructures.
- Delivered seamless cloud migrations with zero critical downtime for major customers in APAC and UK regions.
- Orchestrated major client project across North India (2008–2009), overseeing cement plant and office IT operations across locations.
- Reintegrated into the core IT team to manage multi-location operations in Delhi NCR including a large office/campus in GNOIDA.

Documentation & Governance: HLD,
LLD, SOW, SOPs
